History

- 1962 Fuichi Hagihara (the second) founded Hagihara Industries with production of PE monofilaments for patterned mat warp
- 1964 Flat yarn development : Inline
- 1965 Flat yarn production breakthroughs : Patent obtained for hot-plate stretching method Joint development of Winder TS36 with Torii
- 1966 First export of flat yarn production equipment to Taiwan Xinsheng Zhimashe
- 1970 Flat yarn production for rice/corn sacks and Kasaoka Factory constructed Established Tokyo Business Office
- 1974 Completed construction of the totally integrated Tarpee production factory, first in the industries of blue tarps, threads, weaves, and laminations
- 1976 Export of integrated large-scale bag-manu-facturing plant to fertilizer company managed by the Indonesian government

- 1980 Completed unmanned processing machine for sandbags Completed processing machine for Tarps that reduces labor hours
- 1981 Completed construction of plant manufacturing factory equipped with machining center
- 1981, Continuous development, market launch, and export expansion of machinery related to high-performance flat yarn
- **1989** Completed construction of Satosho Factory for totally integrated production of carpet backing fabric
- 1994 Entered paper slitter market
- 1995 Established Indonesian subsidiary
- 1996 Completed construction of Kayo Factory Entered BarChip F (concrete reinforcing fibers) market
- 2000 Listed in the second section of the Osaka Stock Exchange

- 2001 Listed in the second section of the Tokyo Stock Exchange
- Completed construction of Qinadao, China Factory
 Launched SAP-R3 (full implementation
- 2004 Opened a design office in Shanghai, China
- Internationalization of machine business: Establishment of Shanghai subsidiary for design, parts procurement, and assembly
- Completed construction of new engineer ing factory and new office
- Reconstructing the integrated production system at the Kayo Factory 2010 Third-party share allocation and public
- Completed construction of second factory
- 2013 50th anniversary of company founding

- 2014 Listed in the first section of the Tokyo Stock Exchange
- 2018 Acquired EPC, an overseas agency Established BarChip Inc. subsidiary Received the top prize from the Ministry of Economy, Trade and industry at the "Most Valuable Companies in Japan " Awards of
- Acquired Toyo Heisei Polymer Co., Ltd.

2019 Established Thai subsidiary

- 2020 Recognized as "Global Niche Top Companies election 100" from the Ministry of Economy, Trade and Industry
- 2022 Listed in the Prime Market of the Tokyo Established Paraguayan subsidiary Received the Excellence Prize from the ECO MARK AWARD 2022
- 2023 Liquidated Qingdao, China subsidiary Established Texas, USA subsidiary Established new Kasaoka Factory

Hagihara Industries

HAGIHARA INDUSTRIES INC.

COMPANY PROFILE

Enriching the world

with flat yarn technology

Message from the President

Enriching people's lives with a consistent mission since our founding

Human beings and companies do not exist on their own, but rather owe their existence to the surrounding society.

Companies have their own imperative missions and roles to be played in this world. We will continue to put forth great efforts to make the lives of people safer and more comfortable, as well as to enable efficient economic activities through our products and related machinery developed from our flat yarn manufacturing

Hagihara Industries is the company where people and products continue to dynamize.

Kazushi Asano, President

Think outside the box. create new values.

The world is constantly changing. Even common sense is constantly changing. The common sense of today may not be the same as the common sense of tomorrow. Think outside the box, create new values. We are the ones who create new values.

Corporate philosophy

always be a valuable company for the

Mission statement

- By embracing flat yarn technologies, 1. Hagihara Industries is an industry leader.
- we are continuously evolving to 2. Hagihara Industries' life mission is to earn your trust.
- sake of society and people around the 3. Hagihara Industries never forgets its debts of gratitude.
 - 4. Hagihara Industries values employees creativity and takes great pleasure seeing our employees fulfilling their potential.

Flat Yarn: Growing in Usage and Technology

"The flat yarn" is a thin thread made by slitting (cutting into strips) polyethylene or polypropylene film and stretching it to give it strength.

Products made with flat yarn have been formed into sheets and packaging materials for a variety of applications such as blue sheets (blue tarps), and are widely used in construction, civil engineering, agriculture, logistics, etc.

Flat yarn technology still has immense potential.

Our mission is to build on that potential and bring benefits to society as

Four core technologies: Slitting, Stretching, Winding, Weaving

Since our company's founding, we have cherished our role of managing business focusing on the core competence of four technologies of "Slitting, Stretching, Winding, and Weaving." By strengthening our core technologies and boosting their added value, we are increasing our competitiveness and technological capabilities.

Recycled products

Products

The range of products created by our flat yarn technology has been expanded and refined in response to various needs around the world. Products that enhance safety, security, comfort, and convenience have become ingrained in our daily lives.

Plastic Products

PE/PP Coated Fabrics

Environment

Developed environmentally friendly products Mitigate risk with products such as high by using PE/PP coated fabrics made from ioint holes without using aluminum evelets.

Construction and Civil Engineering

specialized flame retardant, soundproof, and dust proofing.

absorbent sandbags, PE/PP Fabrics and FIBC with durability and water resistance

Agriculture and Livestock

Support the food supply with reflective of crops, and Blackout products improve

Light and durable bags are ideal for storing and transporting powders and granular materials, and breathable mesh type bags are suitable for storing and transporting

Produce synthetic resin fibers such as "Flat products to promote photosynthesis, coloration Yarn" and "Monofilament yarn", used for artificial turf, broom, and apparel fiber etc.

for any kinds of fruit or vege bag. Light weight but durable and less prone to

used for packaging and special purpose.

Carpet Backing Cloth

A high-strength, low-shrinkage flat yarn fabric used as the base material for adding

Re VALUE + Re VALUE+ Blue Sheet Recycling Project

recycle 5,000 tons of waste blue sheets per year under "Re VALUE+" project.

"Re VALUE+" is a horizontal recycling project launched by Hagihara Industries and J&T Recycling Corporation to collect used blue sheets (blue tarps) and manufacture new ones. Our goal is to gradually develop a recycling scheme for blue sheets, and collect and

Engineering Products

Unwind, convert (slit) and rewind films and can be cut into narrower rolls

papers so that large rolls of these materials

Efficiently performs doffing operations as part of the winding process for synthetic varns, multifilament material, and other

Circulation of blue sheets

Pelletization

Integrates all processes, from crushing and The equipment is used to manufacture pellets that serve as raw material for recycled plastic

"BarChip" fibre replaces steel reinforcement in concrete, eliminating corrosion and improving crack control. BarChip and lowers CO2 emissions

medicinal cosmetic ingredients impregnated in the film to ensure a constant release of
